

Latest handle model found in Würselen on July 2026.

Finalizing my two years of work, I am returning to 32 handle models, established before 1903 (see my early work WMF Marks: Enigmas and Discoveries, p.179). With my new punch ladle (Length 38.7 cm), the whole number of Jugendstil handle models before 1903 reached 33. The full number of Jugendstil handle models (1892 - 1922) reached 48.

Two upper horizontal photos demonstrate the handle model “Jugendstil tt”. This new punch ladle based on the beautiful vineyard style. Above there is a mark of the concrete cutlery piece, including the main part with the inscription WMFN. This latest mark (and for me is the last one) is a good another punch ladle appearance before 1903.

Dr. David N. Nikogosyan, Bonn, September 2026.
